*Exceeds the 70ppb NAAQS standard.

Clean Power Plan
A.K.A.: 111(d), GHG Rules for Existing Power Plants

EPA's four principles:

1. Burn less coal
 2. Greatly increase renewable generation
 3. Use existing gas-fired plants more
 4. Don't build new gas-fired plants
- 26 of 47 affected States have sued and asked for a stay
Decision in mid- spring possible
